About Our Academy

PS Academy is the industry-led academy of Perception System, backed by 25+ years of real-world technology experience. We bridge the gap between education and industry by helping students build practical skills and AI-ready careers.

Our Difference

We don't just teach technology.
We build professionals.

We don't believe in theory alone.
We believe in build, ship and repeat.

We don't prepare you for a test.
We prepare you for a tech career.

We don't follow the old curriculum.
We follow industry, trends and the future.

We don't compete with AI.
We empower you to build with AI.

Why Choose Us?

Built on 25+ Years of Industry Experience.

PS Academy combines Perception System's 25+ years of software and technology expertise with an industry-first approach to education. Students learn from experienced professionals through hands-on projects, real-world use cases, and practical assignments designed around actual industry requirements.

Tech stack you learn

AI

- LangChain
- Knowledge base
- Python
- LLMs
- Supabase
- Fine Tuning

AWS

- AWS
- S3
- DynamoDB
- AWS Security
- Lambda
  API Gateway
- Bedrock
- SQS / SNS
- VPC

Our Programs

✦ Designed for an AI-First Career

Course Duration
6 Month

Become an AI Pro

Learn RAG, AI Agents & Agentic AI

For: Students & Freshers of BE/BCA/MCA/MSc IT.

AI & RAG Engineering — In-Person Bootcamp

The full hands-on program: build embeddings, RAG pipelines, and a deployed capstone project with mentor guidance.

✦ In-Person Bootcamp

Course Duration
6 Month

Become an AWS Pro

Learn, Build, Deploy & Ship Cloud Native Apps

For: Students & Freshers of BE/BCA/MCA/MSc IT.

Cloud Native Engineering -- In Person Bootcamp

The full hands-on program teaches you how to build highly scalable systems from the start of your career.

Our Partners And Technology Allies

aws | Azure | Google Cloud

Education | Visual Studio Code | POSTMAN

Why Learn AI & RAG

Retrieval-Augmented Generation is how real companies put large language models to work on their own data — securely, accurately, and at scale.

The enterprise standard

RAG grounds LLMs in a company's own data — accurate, current, and secure. It's how AI ships in the real world.

Highest-demand skill

AI and RAG engineers are among the most sought-after and best-paid roles across every industry today.

Learn by building

No slide-only lectures. You build embeddings, vector search, and full RAG pipelines from day one.

Mentored by shippers

Guided by engineers who build AI for Fortune clients — you learn what actually works in production.

Turn knowledge into capability and capability into confidence.
